SIX NATIONS 2013

Commentary

There was no Grand Slam in 2013 but Wales regained the Six Nations in 2013 on points difference, denying England a Grand Slam in the final match of the tournament, with Scotland achieving their highest place finish since 2006. The three remaining teams had mixed fortunes, Italy finished fourth for the second time in Six Nations history, while Ireland and France achieved their lowest ever finishing positions. The final standings are as set out below.

	P	W	D	L	F	A	PD	TS	PTS
 Wales	5	4	0	1	122	66	56	9	8
 England	5	4	0	1	94	78	16	5	8
 Scotland	5	2	0	3	98	107	-9	7	4
 Italy	5	2	0	3	75	111	-36	5	4
 Ireland	5	1	1	3	72	81	-9	5	3
 France	5	1	1	3	73	91	-18	6	3

TRY SCORING

Overall, there were 37 tries scored in Six Nations 2013, giving an average of 2.5 per match. This was not only the lowest average in Six Nations history, but the lowest in the 18 years since the Game went professional in 1995. The number of tries has decreased steadily since 2000 as the following chart illustrates.

The impact of such a decline can be illustrated by comparing the number of tries scored to the inaugural Six Nations in 2000.

- In 2013, there were **37**, or **51%**, fewer tries scored than in 2000.
- In the last two years (2012/2013) a total of **83** tries were scored, but in 2000 and 2001 the comparative figure was **150**, a difference of **77** tries.

The tournament had a dramatic start with 16 tries scored in Round 1 suggesting that the decline in try scoring had halted. However, as the tournament continued fewer tries were scored, with only 21 tries being scored in Rounds 2 to 5. This difference can be highlighted by looking at try scoring rates. In Round 1, for example, a try was scored every **8 minutes 30 secs** of possession while in the remaining rounds a try was scored for every **24 minutes** of possession.

	TOTAL TRIES	AVERAGE TRIES PER MATCH
Round 1	16	5.3
Round 2	6	2.0
Round 3	5	1.7
Round 4	4	1.3
Round 5	6	2.0
Total	37	2.5

A further breakdown of Rounds 2 to 5 showed that only Scotland scored more than two tries in a match. Wales were the only team to score in every match that they played, while England scored only one try in their last four matches.

	TRIES SCORED DURING ROUNDS 2 – 5
 Wales	1, 2, 1, 2 = 6
 Scotland	4, 0, 0, 1 = 5
 France	0, 1, 1, 2 = 4
 Italy	1, 0, 1, 1 = 3
 Ireland	0, 1, 1, 0 = 2
 England	0, 1, 0, 0 = 1
Overall average	1.8 tries per match

A feature of the championship, and in particular Wales, was defence. Wales conceded three tries against Ireland in their first match, but did not concede a single try in their last four matches.

		TRIES CONCEDED DURING ROUNDS 2 – 5
	Wales	0, 0, 0, 0 = 0
	Ireland	0, 0, 1, 1 = 2
	France	1, 1, 1, 1 = 4
	England	0, 1, 1, 2 = 4
	Scotland	1, 1, 1, 2 = 5
	Italy	4, 2, 0, 0 = 6
Overall average		1.8 tries per match

PENALTY GOALS

While tries decreased this year, penalty goals increased.

- Penalty goals averaged 6.3 per match which was the highest since the Five Nations Championship restarted after the Second World War in 1947.
- One consequence was that penalty goals outnumbered tries by two and a half times to one. Only once has this ratio been exceeded in the 66 years since 1947.

Despite this, tries still remain the most significant element in winning matches. While penalty goals can have a major impact in parts of a match, matches are most often won by the team scoring the most tries. In 2013, almost 60% were won by the team scoring the most tries, in four matches the try count was the same and in only two matches did the team scoring the fewest number of tries win (**Scotland v Ireland** and **England v Italy**).

This reflects previous years. In the last five years, for example, 70% of matches have been won by the team scoring the most tries while only 11% were won by the team scoring the fewest number of tries.

SCRUMS

Last year's report referred to the fact that, at Tier One level, there are many more collapses, more scrum penalties and free kicks than the tiers below. RWC 2011 was given as an example and the table below was produced to show that, in that tournament, Tier One matches contained two and a half times more collapses and penalty kicks than Tier Two or Three matches.

RWC 2011	COLLAPSES PER 100 SCRUMS	RESETS PER 100 SCRUMS	PK/FKS PER 100 SCRUMS
Tier One v Tier Two	50	31	41
Tier One v Tier Two	19	9	17

The analysis of scrums in Six Nations 2013 confirmed that the core problems at Tier One level continue and are increasing, with more scrums collapsing and, for the first time in any Tier One tournament, over half of all scrums ended with a penalty or free kick.

	COLLAPSES PER 100 SCRUMS	RESETS PER 100 SCRUMS	PK/FKS PER 100 SCRUMS
Six Nations 2013	59	30	51
Six Nations 2012	49	33	39

The extent of the problem can be illustrated by one match – **Wales v England**. This match resulted in:

- 13 scrums
- 11 collapses
- 6 resets
- 10 penalties and free kicks
- the ball came back into play just three times

Problems relating to current scrums are also having an effect on the shape of the Game. With fewer scrums taking place and more penalties and free kicks being awarded, possession from the scrum has now become a less significant part of the Game. In this year's championship, for example, Wales had possession from the scrum on only 13 occasions from 38 scrums in their five matches. They did however obtain 20 penalties on their own put-in while conceding only five.

On average the ball came out of the scrum seven times per match. The number of times each team in the Six Nations 2013 obtained scrum possession is shown in the following table:

		SCRUM POSSESSION IN 5 MATCHES	AVERAGE NO OF TIMES PER MATCH
	Wales	6, 2, 2, 2, 1 = 13	2.6
	England	6, 2, 2, 2, 1 = 13	2.6
	Scotland	8, 6, 2, 2, 1 = 15	3.0
	Ireland	7, 4, 3, 2, 2 = 18	3.6
	Italy	7, 7, 6, 2, 2 = 21	4.2
	France	8, 7, 5, 3, 3 = 26	5.2

With such little scrum possession, it is not surprising that three of the six teams failed to score a single try from this source, with just five tries resulting from scrums. This compares with 11 from lineouts, 11 from opponents' kicks and eight from turnovers.

Therefore, for certain teams, it appears that the benefit from scrums comes not so much from possession, but from the penalties and free kicks they manage to obtain. Wales and England, for example, each obtained the ball from their own scrum just 13 times in their five matches while receiving 20 and 17 penalties and free kicks respectively.

Not all teams, however, had such a profile. In the Six Nations, for example, the ball came out on Italy's scrum ball 21 times out of 35 scrums.

The table shows that the main feature of the Welsh and English scrums was the predominance of sanctions whereas that of Argentina, New Zealand and Australia scrums in The Rugby Championship 2012 was ball possession.

SIX NATIONS 2013	TOTAL SCRUMS	PK/FKS PER 100 SCRUMS	BALL OUT PER 100 SCRUMS	THE RUGBY CHAMPIONSHIP 2012	TOTAL SCRUMS	PK/FKS PER 100 SCRUMS	BALL OUT PER 100 SCRUMS
WALES	38	66	34	SOUTH AFRICA	32	41	59
ENGLAND	36	64	36	NEW ZEALAND	47	30	70
SCOTLAND	30	50	50	AUSTRALIA	43	28	72
IRELAND	32	44	56	ARGENTINA	38	26	74
FRANCE	46	43	57				
ITALY	35	40	60				

This was emphasised when the output of scrums was examined. Neither Wales nor England scored a single try from scrum possession. New Zealand, however, utilised their scrum possession to score five tries while Australia used their possession to score two. This produced a total of 47 points to New Zealand and Australia and none to Wales and England. Wales and England did however obtain 27 points from scrum penalty goals while New Zealand and Australia obtained only nine.

Wales' defence has been highlighted as one reason why they were so successful in the Six Nations 2013. Other aspects of Wales' performances are as follows:

- They had the highest proportion of possession in their matches
- They used phases in the build-up to tries with seven of their nine tries having at least three phases
- They scored the most tries and conceded the least
- They scored eight of their nine tries in the second half
- They conceded three tries in 84 minutes ball in play
- The backs scored seven tries and the forwards scored two tries
- They had the highest rucking rate and a high ruck retention rate
- They were awarded the highest proportion of penalty kicks/free kicks

MATCH FACTS

SCORING

- There was one match with no tries scored.
- 60% of matches were won by the team scoring the most tries.
- Wales scored the most tries and conceded the least.
- For every two tries, there were three penalty goals.
- 11 of the 15 matches had a margin of 10 points or fewer.
- The highest scoring margin was 27 points (**Wales v England**).
- The try rate was one try every 14 minutes of ball in play.
- Wales did not concede a try in four matches, during which their opponents had over 70 minutes of possession.
- 73% of tries were scored by backs, 27% by forwards.
- All Scotland tries were scored by backs.
- 60% of tries originated from lineout possession and kick receipts.
- Wales, Scotland and England did not score a single try from scrum possession.
- 38% of tries started from inside the scoring team's own half.
- All five tries conceded by Ireland were from possession sourced inside Ireland's 22m.
- Scotland scored five tries from inside their own half, England and Ireland scored none.
- 62% of tries were preceded by three or fewer phases while 77% of Wales' tries had three or more phases.
- 30% of tries were scored in the first half and 70% in the second half. Ireland conceded all five of their tries in the second half.
- Scotland were the most successful at place kicks, France were the least.
- Only three of 12 drop goal attempts were successful, with Italy kicking two.

ACTIVITY

- The team with the least possession won on six occasions.
- Wales and Italy had the highest proportion of possession in their matches.
- England had the highest passing rate, Scotland the lowest.
- The three highest passing matches were in the first round of the tournament – over 300 passes per match.
- Wales made 156 passes during the second half against Ireland while the Ireland v England match had a total of 153 passes.
- England forwards were most likely to pass, Ireland forwards the least likely.

- England's front row, France's second row and Italy's back row were the most likely forwards to pass.
- Scotland's centres made a total of 15 passes in five matches.
- Wales had the highest rucking rate, Scotland the lowest.
- The most ruck/mauls Scotland had in a match was 85 while Wales had 97 ruck/mauls during the second half against Ireland.
- Scotland had the highest kicking rate in open play. Italy had the lowest.
- The highest kicking match was Italy v Wales with 74 kicks.
- England's centres only made two kicks in five matches.

SET PIECE

- Italy were the most successful at regaining contestable restarts and retaining possession at scrum and lineout.
- Wales were the least successful at regaining contestable restarts, but kicked 78% of restarts long.
- Scotland contested more lineouts than any other team and stole the most possession. Wales contested the least and stole the least.
- The scrum success was 82%, with 69% of penalty kicks/free kicks in favour of the attacking team. There were only four tightheads and three through 90 degree turnovers.
- Wales were awarded 25% of all scrum penalties and free kicks.

DISCIPLINE

- Wales were awarded the highest proportion of PK/FKs in their matches and Italy were awarded the least.
- 43% of penalty kicks/free kicks were at tackle/ruck with 62% in favour of the team in possession.
- 31% of penalty kicks/free kicks were at the scrum with 76% of penalty kicks and 59% of free kicks in favour of the team in possession.
- Ireland received the most yellow cards.
- France has received only one yellow card in the last seven Six Nations competitions.

1.2 IMPACT OF THE TRIES & PENALTY GOAL ON MATCH RESULTS

The winning team scored the most tries in **eight**, or **58%**, of matches.

In four matches tries were equal, one of which was a draw. In only two matches did the winning team scoring the fewest number of tries (**Scotland v Ireland** and **England v Italy**).

1.3 WINNING MARGINS

There were **11** matches with a margin of 10 points or fewer.

The winning margins fell into the following ranges.

POINTS DIFFERENCE	NO OF MATCHES	CUMULATIVE
Draw	1	1 drawn
1 – 5	2	3 with 5 points or less
6 – 10	8	11 with 10 points or less
11 – 20	2	13 with 20 points or less
21 – 30	2	15 with 30 points or less
31+	0	-

2.0 TRY SCORING

There were **37** tries scored. The overall try scoring rate for the tournament was one try every **14 minutes** of possession.

2.1 RATE OF TRY SCORING & RATE OF TRY CONCEDED

The following table shows the rate of try scoring and the rate of try conceding. This is a measure of each team's ability to convert possession into tries and each team's ability to prevent opposition converting possession into tries.

		TRY SCORING RATE			TRY CONCEDED RATE
	Scotland	One every 9m 57s		Wales	One every 28m 09s

2.5 NUMBER OF RUCKS / MAULS & PASSES IN BUILD UP TO TRIES

The following tables show the number of rucks/mauls and the number of passes that preceded each try.

It can be seen that **62%** of tries were preceded by three or fewer phases, and that **35%** of tries were preceded by three or fewer passes.
